

Vermont Public Power Supply Authority

POWER ANALYST / SENIOR POWER ANALYST

The Vermont Public Power Supply Authority, located in Waterbury Center, Vermont is seeking a Power Analyst / Senior Power Analyst to join our team. This position will assist in resource portfolio planning, modeling and market analysis for municipal electric utilities.

Essential functions include analyzing and evaluating power supply options (including wind, solar, natural gas, biomass, and hydro) to assist resource portfolio development, analyzing and recommending electric energy market purchases and sales strategies, developing long and short-term energy usage and commodity forecasts, market and regulatory compliance filings, managing energy portfolios in a centralized market, preparing written documents and presentations for education and marketing, recommending and presenting power supply and policy positions and strategies to internal staff and Members, and developing and reviewing electric power supply contracts with suppliers and members.

Demonstrated proficiency in excel and excellent oral and written communication skills required. Experience performing quantitative analysis, knowledge of wholesale energy markets, portfolio management, forecasting, or energy commodity trading preferred. Experience in the utility industry and database software experience desired.

VPPSA is building a team of professionals who are passionate about helping Vermont towns meet their energy needs. If you are a team player and enjoy a fast-paced collaborative environment we want to hear from you. Please send resumes and salary requirements to:
