

Vermont Public Power Supply Authority

Manager of Field Services

The Vermont Public Power Supply Authority, located in Waterbury Center, Vermont is seeking a Manager of Field Services to join our team. This a senior leadership position that will provide on the ground supervisory support to the Authority's member electric utilities as well as overseeing the operations of VPPSA's Project 10 peaking generation plant and GIS mapping program.

Essential functions include: Provides management services to member utilities on both a temporary and ongoing basis, manages operation of VPPSA's Project 10 generating station to ensure compliance with permit conditions, oversees the GIS mapping function to both facilitate maintenance of accurate member system maps and the use of those maps for analytical activities, manage VPPSA's safety program, manages engineering contracts, and provides legislative and regulatory support on topics of relevance.

Knowledge of utility management, field operations and safety practices, project management, and engineering practices equivalent to completion of four years of college and ten or more years of progressively responsible related experience preferably in a utility operating in a fully regulated environment. Senior level municipal utility management experience preferred.

VPPSA is building a team of professionals who are passionate about helping Vermont's communities meet their future energy needs. If you are a team player and enjoy a fast-paced collaborative environment we want to hear from you. Please send resumes and salary requirements to: Vermont Public Power Supply Authority, PO Box 126, Waterbury Ctr., Vermont 05677 Attn: General Manager, or to knolan@vppsa.com. The position will be open until filled.
