6. Restricted Cash Schedule - Swanton Peaker Project # 10	60
7. Restricted Investment in VT Transco, LLC - Summary of Units Held	61
8. Restricted Investment in VT Transco, LLC - Allocation of Units	62

Introduction to the Management's Discussion and Analysis (MD & A)

This annual financial report consists of two parts: The Management's Discussion and Analysis (MD & A), and the independent auditor's report which includes the financial statements for the fiscal years that ended on December 31, 2019 and 2018.

The purpose of this section of the Vermont Public Power Supply Authority's (the Authority) annual financial report (the MD & A) is to provide the reader with a summary of the Authority's financial performance and any significant events that occurred within the organization that may or may not have had an impact on that financial performance. The MD & A is intended to be a less comprehensive, reader-friendly synopsis that is understandable to all readers, not only those with a financial background.

The section following the MD & A provides a comprehensive look at the Authority's financial statements including the Authority's Statement of Net Position (formerly known as the Balance Sheet), Statement of Revenues, Expenses and Change in Net Position and Cash Flow Statements.

Together, the MD & A and financial statements illustrate the Authority's overall financial status and/or performance and should be read in conjunction with one another.

Items of Significant Interest

Items of significant interest as of December 31, 2019 are as follows:

- Change in Net Position - Increased \$ 2,839,827
- Net Capital Assets - Decreased - \$ 1,306,634
- Moody's reaffirmed VPPSA's Project #10 revenue bond rating for the Swanton Peaker Project at Baa1 with a stable outlook
- Total repayments on outstanding bonds and/or long-term debt: \$ 12,104,388
 - Includes repayment of \$8,745,500 related to Lamoille County Specific facilities private placement

Overview of the Financial Statements

The financial statements included within this report include a summary of the Authority's Statement of Net Position (formerly known as the Balance Sheet), Statement of Revenues, Expenses and Change in Net Position and a Statement of Cash Flows. The Authority's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to governmental enterprise funds (same basis of accounting as private-sector business enterprises) and employ an economic resources measurement focus and the accrual basis of accounting. Under this basis, revenues are recognized in the period in which they are earned, expenses are recognized in the period in which they are incurred, and depreciation of capital assets is recognized in the Statements of Revenues, Expenses, and Changes in Net Position. All resulting assets and liabilities associated with the operation of the Authority are included in the Statement of Net Position.

The Statement of Net Position presents information on the "assets and deferred outflows of resources" and the "liabilities and deferred inflows of resources", with the difference between the two groups reported as the company's "Net Position". The change in net position is one way to measure the Authority's financial health.

The Statements of Revenues, Expenses, and Changes in Net Position report provides the operating revenues and expenses and non-operating revenue and expenses of the Authority for the fiscal year, along with any capital grants to determine the change in net position for the fiscal year. That change, combined with last year's net position total, reconciles to the net position total at the end of this fiscal year.

The Statement of Cash Flows report provides cash and cash equivalent activities for the fiscal year resulting from operating activities, non-operating activities, capital-related financing activities, noncapital related financing activities and investing activities. The net result of these activities added to the cash balance from the beginning of the year reconciles to the cash and cash equivalent balance at the end of the current fiscal year.

The Authority's reported financial statements include its project ownership interests as follows:

- The Authority's 19% ownership of the J.C. McNeil Generating Station Project #2.
- The Authority's 9.36% ownership of the 225MW AC-DC-AC Highgate Converter Station Project #3 (asset sold in 2017).
- The Authority's 100% ownership of the 40 MW Swanton Peaker Project #10.

Financial Summary

The two tables on the next page 1) summarize information related to the Authority's assets and deferred outflows of resources and 2) summarizes information related to the Authority's liabilities and deferred inflows of resources. As stated earlier, the difference between the two groups is reported as the Authority's "net position". This information is provided for the years ending December 31, 2019, and 2018.

Vermont Public Power Supply Authority
 Management's Discussion and Analysis (Unaudited)
December 31, 2019 and 2018

	<u>2019</u>	<u>2018</u>
Capital Assets, net	\$ 15,920,689	\$ 17,227,323

TOTAL LIABILITIES AND NET POSITION	\$ 71,102,935	\$ 80,548,830

Changes in Assets and Deferred Outflow of Resources:

The Authority maintains fixed (or capital) assets and categorizes current and long-term assets. Within each of these categories, some assets are classified as unrestricted and available to meet general operating needs and others are classified as restricted due to contractual obligations and/or other restraints that are placed on those assets. The primary restricted assets include those assets that are project-related, where the Authority is obligated to maintain a separate and distinct accounting for those project funds.

Fixed Assets - Fixed assets (or capital assets) are stated at historical cost and include assets related to land, production plant, transmission plant and general plant. A portion of these capital assets relate to the Authority's joint ownership in the following jointly owned facilities:

- The Authority's 19% ownership of the J.C. McNeil Generating Station Project #2.
- The Authority's 9.36% ownership of the 225mW AC-DC-AC Highgate Converter Station Project #3 (asset sold in 2017).

The following chart summarizes the Authority's fixed assets and accumulated depreciation for the years ended December 31, 2019 and 2018:

		2019	2018
Capital assets	\$	48,147,870	47,849,332
Less accumulated depreciation		32,227,181	30,622,009
Total capital assets, net	\$	15,920,689	17,227,323

Capital Assets decreased \$1,306,634 ↓

- Routine Capital improvements
- Annual depreciation on assets in service

Current Assets - Current assets are generally defined as those assets that can be easily converted into cash within one year. The Authority's current assets are primarily comprised of cash and cash equivalents, short-term investments, accounts receivable, and inventories. Changes in current assets include:

2019

Current Assets increased \$495K or 2.7% ↑

- Increase in Cash & Cash Equivalents
 - Decrease in receivables
 - Project 10 participants contributed to reserve fund
 - Earnings on funds invested
- Decrease in inventories

2018

Current Assets increased \$1.2M or 6.8% ↑

- Increase in Cash & Cash Equivalents
 - Project 10 participants contributed to reserve fund
 - Earnings on funds invested
- Increase in inventories
- Increase in Accounts Receivable

Long-term Assets - Long-term assets are generally described as the value of a company's property, equipment and other capital assets that are expected to be usable for more than one year, less the accumulated depreciation recorded on these assets. Fixed (capital) assets were previously described above; therefore, this section includes "other" long-term assets or those that are long-term in nature but not related to the Authority's physical property and/or equipment. This includes long-term investments and other miscellaneous long-term assets such as amounts due from members and long-term prepayments. The investments classified as long-term are those that represent funds invested for periods longer than 90 days.

The Authority holds three types of investments - those related to project bond funds (debt service accounts), the Authority's purchase of membership units in Vermont Transco, LLC and the Authority's investment in Hometown Connections, Inc.

Bond Funds:

In 2019 and 2018, the Authority invested bond funds held, but not required for immediate expenditure, using several different instruments such as Certificates of Deposit, Treasury bills, Treasury notes and other Federal Agency Obligations.

In 2019 bond fund investments increased approximately \$35K or 1.9% and in 2018 bond fund investments decreased less than \$12K or .6%.

The increase in 2019 is primarily related to an increase in earnings on the investments and the decrease in 2018 is primarily related to the increase in the value of the unrealized loss on the investment held (due to market volatility).

Vermont Transco Membership Units:

Transco Investment Activity				
	2018		2019	
	# Units	Value	# Units	Value
Beg Balance	4,064,106	\$ 40,641,060	4,188,878	\$ 41,888,780
Purchases	124,772	\$ 1,247,720	45,437	\$ 454,370
Sales	-	\$ -	(874,650)	\$ (8,746,500)
Total	4,188,878	\$ 41,888,780	3,359,665	\$ 33,596,650

As of December 31st, the Authority owned a total of 4,188,878 member units valued at \$41,888,780 and 3,359,665 member units valued at \$33,596,650 in 2018 and 2019, respectively.

Hometown Connections, Inc.:

In 2018, the Authority partnered with four (4) other agencies to establish a non-profit entity that provides consulting and technology services, as well as advance metering programs to public power utilities across the United States.

This investment will bring greater value to the public power industry (including the Authority's members) by combining resources and allowing power utilities of all sizes to obtain the products and services they need to keep their electric systems robust and to preserve the benefits of community-owned, not-for-profit service. The Authority contributed \$265,000 to the new company and obtained an equal ownership in the organization. In 2019, a sixth non-profit entity joined Hometown Connections, Inc., providing additional capital to the organization.

Other Long-Term Assets:

Other long-term assets increased in 2019 by approximately \$31K or 6.6% and decreased in 2018 by less than \$48K or 9.3%. The increase in 2019 and the decrease in 2018 are both related to the changes in future revenues due from members, primarily from the McNeil Project.

Deferred Outflows of Resources - Deferred Outflows of Resources are defined as a consumption of net assets that are applicable to a future reporting period. In simple terms, this generally includes transactions where resources (typically cash) are expended but the reporting (expensing) for that transaction would occur over a period of years. These types of transactions have a positive effect on a company's net position, similar to assets. Examples of this are derivative instruments that have a positive impact to the company, unamortized debt issuance costs, amounts resulting from the refunding of debt, loan origination costs, etc. Specific to the Authority, this includes the amortization of the loss on reacquired debt related to the Project #10 Bond refunding in 2017 and a future regulatory expense related to Project #10. The amortization of loss on reacquired debt related to the Project #10 refunding was fully amortized in 2019.

Changes in Liabilities and Deferred Inflows of Resources:

The Authority maintains several long-term debt obligations and records current and other long-term liabilities. Similar to how the Authority records its assets, some liabilities are classified as unrestricted and available to meet general operating needs and others are classified as restricted due to contractual obligations and/or other restraints that are placed on those liabilities. The primary restricted liabilities include those liabilities that are project-related, where the Authority is obligated to maintain a separate and distinct accounting for those project funds.

Current Liabilities - Current liabilities are generally defined as a company's debts or the sum of money owed to other parties, due and payable within one year. The Authority's current liabilities include accounts payable, amounts due to members, short-term debt obligations, the current year portion of long-term debt obligations, accrued interest payable and other miscellaneous short-term liabilities. The changes in current liabilities include:

2019	2018
Current Liabilities decreased \$6.6M or 39.3% <ul style="list-style-type: none"> • Slight increase in Accounts Payable • Significant decrease in LTD-current maturities <ul style="list-style-type: none"> ○ Annual reductions to Transco LTD ○ Maturity of LCSF LTD (included in current portion) • Decrease in amounts due to Member related to REC transactions 	Current Liabilities increased \$8.7M or 105% <ul style="list-style-type: none"> • LTD moved to Current Portion <ul style="list-style-type: none"> ○ Maturity of LCSF maturity ○ Annual reductions to Transco LTD ○ Addition of two new Transco facilities

Long-Term Liabilities - Long-term liabilities are generally those debt obligations such as bond payments, leases and other obligations that are due in more than one year. The Authority's primary long-term liabilities at December 31, 2019, consist of one outstanding bond issue and ten (10) long-term debt obligations (eight LTD obligations at December 31, 2018). Other long-term liabilities include accrued liabilities that are expected to be paid in a future period such as accrued vacations payable to employees.

In 2017, the 2009 Series bonds that were used to facilitate the construction of the Authority's Swanton Peaker Project #10 located in Swanton, Vermont were advance refunded, with the 2009 Series being defeased with the issue of the 2017 Series bonds. Bonds payable decreased \$1.2M or 8.1 % in 2019 and decreased \$1.1M or 7.3 % in 2018. These reductions were the result of the repayment of principal on bonds outstanding during these years.

The Authority maintained eleven (11) long-term debt facilities in 2019 and nine (9) long-term debt facilities in 2018. In 2019, ten of the facilities were to facilitate purchases of membership units in VT TRANSCO for the benefit of certain of the Authority's members and one (1) facility was to finance upgrades to our office building in Waterbury Center. In 2018, all nine (9) of the facilities were directly related to purchases of membership units in VT TRANSCO.

In 2019, long-term debt facilities decreased by \$3.9M or 19.9% and decreased by \$9.7M or 33% in 2018. In 2019 and 2018, the changes were attributed to the ongoing principal repayment of existing long-term facilities.

Other long-term liabilities include accrued vacation payable to Authority employees. The value of the accrued benefit to Authority employees is \$98,915 and \$89,297 for 2019 and 2018, respectively.

Deferred Inflows of Resources - Deferred Inflows of Resources are defined as an acquisition of net assets by the company that is applicable to a future reporting period. In simple terms, this generally includes transactions where resources (typically cash) are received but the reporting (income/revenue) for that transaction would occur in a future period. These types of transactions typically have a negative effect on a company's net position, similar to liabilities. Examples of this are credits resulting from the refunding of debt, premiums on debt issuances, loan origination fees, resources generated by current rates intended to recover costs expected to be incurred in the future, derivative instrument valuations that have a negative impact on a company's net position, etc. Transactions specific to the Authority include the derivative liability related to one (1) interest rate swap in 2019 and 2018, the amortization of the premium related to the Project #10 Bond refunding that occurred in 2017 and a future regulatory liability, also related to Project #10. The amortization of the premium was fully amortized as of December 31, 2019.

The mark-to-market valuation of the interest rate swap results in a liability of \$46K as of December 31, 2019 and 2018. The interest rate swap effectively provides a variable to fixed interest rate for one note with one financial lender to facilitate purchases of membership units in VT TRANSCO.

Changes in Net Position:

The difference between a company's assets, deferred outflows and its liabilities and deferred inflows is reported as its "net position".

A company's net position is one way to measure the organization's net financial health. Changes in the Net Position includes Invested in Capital Assets net of related debt, Restricted Net Assets, Unrestricted Net Assets and Other Comprehensive Income.

The Invested in Capital Assets balance, net of related debt, represents the Authority's investment in the McNeil Generating Project #2, and the Swanton Peaker Project #10, less the debt service related to those Projects.

The restricted net assets are comprised of assets restricted due to project obligations and special investments in Vt. Transco, LLC that directly benefit certain of the Authority's members.

The restricted project assets include McNeil and Project 10 and are those investment assets that are reserved for future debt payments and those current assets associated with project operations. The restrictions on these assets arise from the terms of the General Bond Resolutions (if applicable) and Power Sales Agreements for each project.

The Authority's restricted Investment in VT Transco represents the investment held by VPPSA that is either pledged as collateral or is eligible for release from collateral and therefore eligible for transfer to the Authority's members. The restriction on these investments arises from the terms of the Transco Equity Agreement.

Unrestricted Net Assets consist of net assets that do not meet the definition of "restricted" or "invested in capital assets net of related debt."

The total net position increased \$2,839,827 in 2019 and \$3,826,143 in 2018. These increases reflect the Authority's ability to bill and record revenue for debt principal under its billing structure. The accumulated net position results because currently the principal obligations on debt exceed depreciation and amortization.

The Other Comprehensive Income is related to the unrealized gains and/or losses on invested funds and the mark-to-market valuation of one (1) interest rate swap that the Authority entered into providing rate stability to the organization.

Statement of Revenues, Expenses & Change in Net Position:

The following table summarizes the Authority's change in net position as of December 31, 2019 and 2018.

	2019	2018
Electric Sales For Resale	\$ 32,793,814	\$ 31,330,602
McNeil Project Revenue	4,668,323	5,328,260
Highgate Project Revenue	1,675	-
Swanton (P10) Revenue	3,233,830	3,296,106
Other Revenues	2,473,647	3,970,305
Total Operating Revenues	\$ 43,171,289	\$ 43,925,273
Power Production and Other Expenses	4,310,427	4,214,504
Transmission Expenses	11,924,074	11,373,120
Purchased Power	21,136,453	21,865,058
Regional Market Expenses	3,700	5,517
Administration & General Expenses	2,909,387	2,652,713
Taxes	298,472	284,880
Depreciation & Amortization	1,640,118	1,642,531
Total Operating Expenses	\$ 42,222,630	\$ 42,038,322
Net Operating Income(Loss)	948,658	1,886,951
Transco Income/Expenses (net)	3,577,122	3,572,273
Interest Income/Expenses (net)	(1,881,514)	(1,993,107)
Amortizations (net)	159,657	284,565
Proceeds/Expenses Related to Insurance Claim (net)	-	-
Other Non-Operating Income/Expenses (net)	3	31,980
Total Non-Operating Expenses, Net	\$ 1,855,267	\$ 1,895,711
Change in Net Assets	2,803,925	3,782,662
Other Comprehensive Income	35,901	43,481
Transco Investment Return	-	\$ -
UnAppropriated Earnings Distributed	-	\$ -
Net Assets at Beginning of Year	28,790,777	24,964,634
Net Assets at End of Year	\$ 31,630,604	\$ 28,790,777

Operating Revenues & Expenses

A portion of the Authority's operating results reflect income received from member municipal utilities, participating electric cooperatives and several non-member municipal utilities. The project expense and debt service obligations are billed out directly on an entitlement share or contractually agreed-upon method. The Authority's operating and administrative expenses are billed as either project costs or member fees and are recorded as sales for resale.

Electric Sales for Resale - Electric Sales for Resale includes amounts billed by the Authority to its members and non-members for purchased power and transmission expenses paid for on behalf of those members and non-members and excludes all McNeil Project #2, Highgate Project #3, and Swanton Project #10 sales.

McNeil Project #2 - The McNeil Project revenue reflects payments for monthly power costs and debt service obligations in accordance with the McNeil Project's Power Sales Agreements with participating members. The McNeil Project revenues decreased by approximately \$660K or 12% in 2019 and increased \$1.7M or 46% in 2018.

The decrease in 2019 and the increase in 2018 are primarily due to planned maintenance on the generating facility. In 2018, several major planned upgrades were expected, and participants were billed to cover those costs. The upgrades were then delayed until 2019 and actual costs were lower than anticipated.

In 2019, REC revenues related to the McNeil project decreased by approximately \$1.3M and increased by approximately \$.5M in 2018.

Power production costs are the direct result of operations at the McNeil and Project #10 facilities. The portion of power production costs related to the McNeil operations, increased in both 2019 and 2018 by \$213K or 6% and \$23K or 1% respectively. These variances are generally related to changes in operational costs, some of which result from changes in the capacity output of the McNeil station and varying fuel costs.

The chart below represents the capacity and availability factors related to the McNeil Generating Station over the last ten years:

Year	Capacity Factor	Availability Factor	Year	Capacity Factor	Availability Factor
2019	51.9%	72%	2014	65.7%	82.5%
2018	56.1%	77.1%	2013	72.9%	89.7%
2017	61.4%	74.6%	2012	51.3%	83.8%
2016	69.7%	96.3%	2011	51.9%	84.9%
2015	66.3%	82.3%	2010	62.1%	89.7%

Highgate Project # 3 - The Highgate Project revenue reflects payments from the Highgate Project participants for monthly transmission costs and debt service obligations in accordance with the Member Services Agreement with project participants. The sale of the Highgate facility was complete in May of 2017; however, several pending cases at FERC require that the project remain open until the open cases are resolved. During 2019, the project incurred \$1,675 in legal costs and those costs were billed to the project participants.

Swanton Project # 10 - The Swanton Project revenue reflects payments for monthly power costs and debt service obligations in accordance with the Project's Power Sales Agreements with project participants. In 2019 project revenues decreased \$62K or 1.9% and in 2018 revenues decreased \$378K or 10%.

The primary reason for the decrease in both 2019 and 2018 were the result of routine changes in O & M costs for the plant. Due to the nature of the project in several regional markets, the project participants received credits through the Authority's power settlement process of approximately \$4.8M in 2019 and \$5.7M in 2018. These credits more than offset the cost invoiced to participants, providing the participants with a net benefit for both years.

The power production costs related to the operations of Project #10 decreased in 2019 by approximately \$117K or 28% and increased by approximately \$37K or 10% in 2018. The decrease in 2019 and the decrease in 2018 are primarily the result of changes in routine operating costs; primarily the cost of fuel oil that fluctuates based on the current market prices and the output of the facility.

The following chart represents the capacity and availability factors related to the Swanton Peaker Project for the last nine years:

Year	Capacity Factor	Availability Factor	Year	Capacity Factor	Availability Factor
2011	0.086%	98%	2016	0.275%	99%
2012	0.091%	91%	2017	0.168%	100%
2013	0.154%	99%	2018	0.144%	99%
2014	0.064%	99%	2019	0.075%	100%
2015	0.258%	99%			

Other Revenues - Other revenues include the sale of Renewable Energy Certificates (RECs) generated from the J.C. McNeil Project #2, the Waste Management-Fitchburg Landfill facility, and several member's individual Hydro and or Solar units, as well as revenue related to the member's cost of meeting Renewable Energy Standards and computer-related service revenues.

The McNeil REC sales are recorded as revenue and were used to offset Sales for Resale. The value of REC's sold for that last ten years are:

Year	Value	Year	Value
2019	\$1.0M	2014	\$2.8M
2018	\$2.3M	2013	\$2.0M
2017	\$1.9M	2012	\$1.5M
2016	\$2.7M	2011	\$1.5M
2015	\$2.4M	2010	\$1.3M

The Power Purchase Agreement between the Authority and the Waste Management-Fitchburg Landfill facility includes environmental attributes including the sale of renewable energy credits. These credits are recorded as revenue and netted against the cost of the power purchased per the power purchase agreement. The renewable energy credits realized from this resource include:

Year	Value	Year	Value
2019	\$0.7M	2015	\$1.5M
2018	\$0.9M	2014	\$1.1M
2017	\$1.1M	2013	\$1.1M
2016	\$1.1M		

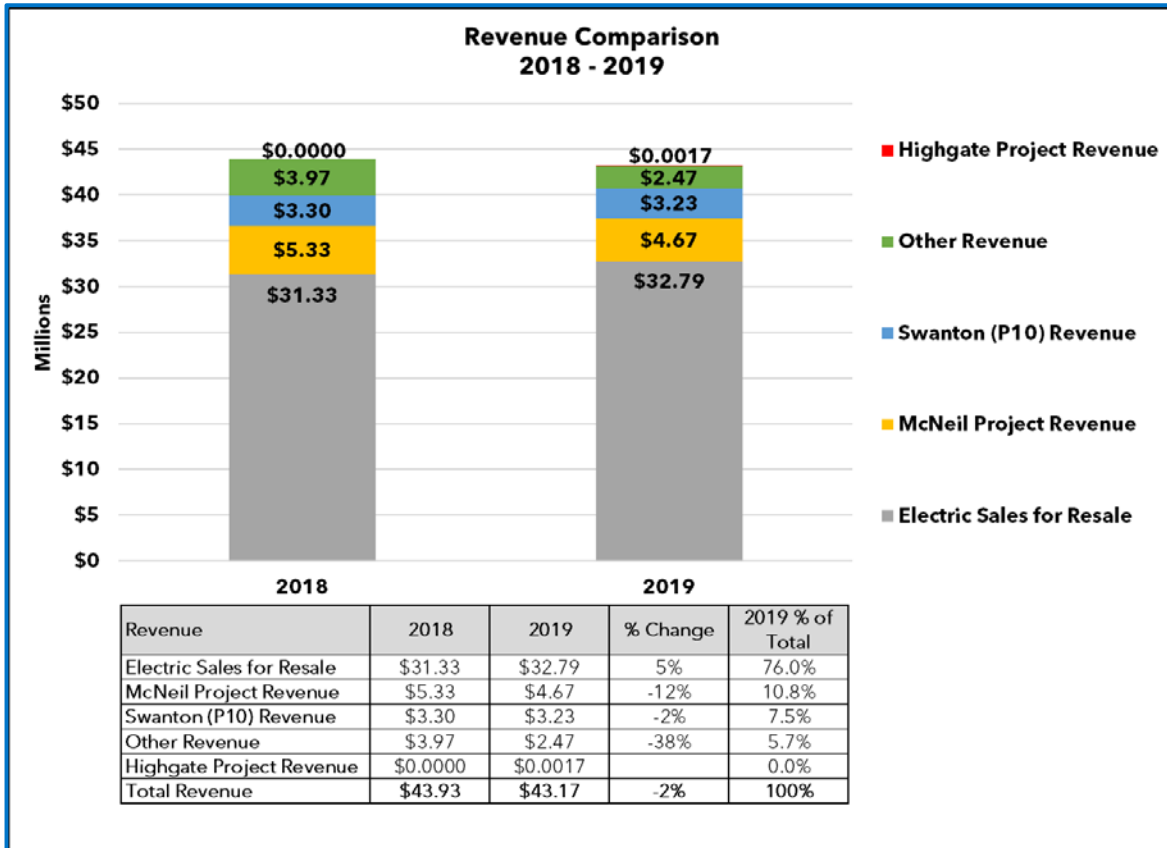

REC revenues produced by the VPPSA members' individual hydro units and several State mandated projects are sold by the Authority on behalf of the members and credited to the member's account, reducing Sales for Resale.

In 2019 and 2018 the Authority purchased Renewable Energy Credits to meet certain Renewable Energy Standards for certain Authority members. The Authority billed out the cost of these charges and it is included in "other" revenues.

Revenues Summary

The following chart provides a snapshot the Authority's Revenues for 2019 and 2018.

Non-Operating Activities

Changes in non-operating activities for 2019 and 2018 primarily include 1) interest earned on deposits and temporary investments, 2) interest expense related to the Authority's debt obligations, 3) distributions and expenses related to the investment of TRANSCO Member Units and 4) revenues and/or expenses related to other misc. non-operating activities.

Interest Earned and Interest Expense - In both 2019 and 2018 interest on deposits and investments increased. These changes are primarily related to the fluctuation in current interest rates, coupled with a change in the amount of funds invested during the period. Interest expense decreased in 2019 and increased 2018. The changes in both 2019 and 2018 are primarily due to the P10 bond advance refunding (in Dec 2017) and the ongoing reduction of principal on bonds and loans outstanding, offset by the addition of two new debt facilities in 2018 and two new debt facilities in 2019.

These interest earnings and interest expense variances include the following:

<p><u>Interest Earned:</u> 2019 = Increase of \$35K or 19.5% 2018 = Increase of \$145K or 390%</p>	↑
---	---

<p><u>Interest Expense:</u> 2019 = Decrease of \$76K or 3.5% 2018 = Increase of \$37K or 4.6%</p>	↓ ↑
--	-----

Distribution Income and Distribution Expense - The Authority currently holds a total of 3,359,665 TRANSCO membership units valued at \$33,596,650. In 2019 distribution income decreased by \$376K or 6.8% whereas in 2018 distribution income increased by \$900K or 17%. The decrease in 2019 was primarily related to less revenue (distributions) received related to VT TRANSCO "non-utility" operations, offset by additional revenue received due to the addition of member units purchased in 2018. The increase in 2018 was related to excess earnings from "non-utility" operations as well as revenues received related to the additional member units purchased in 2017.

Subsequent Events

There have been no subsequent events that have occurred subsequent to December 31, 2019.

Request for Information

This report is designed to provide an overview of the Authority's finances. Questions concerning any of the information found in this report or requests for additional information should be directed to:

Nature of Business

Vermont Public Power Supply Authority ("the Authority") is a joint action agency established by Chapter 84, Title 30 of the Vermont statutes. The Authority is a self-supported agency providing a variety of centralized services to municipal distribution utilities throughout the State of Vermont. Members of the Authority pay monthly administration fees and in return receive a variety of services including but not limited to: central dispatch participation, power supply planning, contract administration, rate and integrated resource planning, and technical support services.

The Authority employs the economic resources measurement focus and the accrual basis of accounting. Under this basis of accounting, revenues are recognized when earned and expenses are recorded when incurred, regardless of when cash is received or paid. The Authority is authorized to issue revenue bonds secured by power sales agreements with its members and other utilities to finance the construction and ownership of electric power facilities; however, the debt of the Authority is not secured by the full faith and credit of the State of Vermont. U.S. generally accepted accounting principles, (hereafter referred to as GAAP), require that the accompanying financial statements present the Authority (the primary government) and its component units. Component units are included in the Authority's reporting entity if their operational and financial relationships with the Authority are significant.

Note 2 - Summary of Significant Accounting Policies

(a) New Accounting Pronouncements

The Authority has completed the process of evaluating the impact of GASB Statement No. 91, *Conduit Debt Obligations*. The primary objectives of this Statement are to provide a single method of reporting conduit debt obligations by issuers and eliminate diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures. GASB Statement No. 91 is effective for financial reporting periods beginning after December 15, 2020. The Authority will implement this standard effective for the year ended December 31, 2020; however, the Authority does not service debt to third parties therefore, it does not believe GASB 91 applies at this time. Management believes all information required to be disclosed by this standard has been included in the Authority's financial statement footnotes.

The Authority has completed the process of evaluating the impact of GASB Statement No. 92, *Omnibus 2020*. The objectives of this Statement are to enhance comparability in accounting and financial reporting and to improve the consistency of authoritative literature by addressing practice issues that have been identified during implementation and application of certain GASB Statements. GASB Statement No. 92 is generally effective for financial reporting periods beginning after June 15, 2020, however the requirements related to GASB 87 and Implementation Guide 2019-3 are effective upon issuance. The Authority does not participate in a defined benefit retirement plan, and therefore management believes the requirements of Statement No. 92 related to pension plans and postemployment benefits does not apply to its operations.

Note 2 - Summary of Significant Accounting Policies (cont.)

(a) New Accounting Pronouncements (cont.)

The Authority may from time to time incur asset retirement obligations relating to its power generation facilities and/or its power transmission infrastructure. Management of the Authority will consider the applicability of Statement No. 92 on a transaction by transaction basis and implement the requirements of the Standard where those standards are deemed by Management to apply.

(b) Use of Estimates

The preparation of the financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(c) Capital Assets

Capital assets are stated at cost. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets. When assets are retired or otherwise disposed of, the costs are removed from plant, and such costs, plus removal costs, are charged to accumulated depreciation.

The Authority's capitalization policy is as follows:

- The combined cost to put a unit in service comes to more than \$5,000, and the unit's estimated life is at least three (3) years; or
- When an existing asset is partially replaced or improved in a way that a) substantially extends the life of the asset or b) substantially improves the asset's utility or;
- The asset is initiated, controlled and tracked as property under a Joint Participation Agreement. The Authority will capitalize the property, even if it falls under the dollar limit above, if the Authority's share of the property is designated as a capital item by the billing agent for the project.
- This policy shall not apply to amounts spent on ordinary maintenance of VPPSA property.

Note 2 - Summary of Significant Accounting Policies (cont.)

(c) Capital Assets (cont.)

The depreciable lives of capital assets are as follows:

	<u>Lives</u>
Electric Plant:	
Land	N/A
Structures and Improvements	30 years
Equipment	3 - 30 years
Meters	10 years
Station Equipment	10 - 30 years
General Plant:	
Land	N/A
Structures & Improvements	10 - 25 years
Equipment	3 - 10 years
Transportation Equipment	3 - 5years
Meters	10 years

(d) Impairment of Long-Lived Assets

In accordance with GASB Statement No. 42, Accounting and Financial Reporting for Impairment of Capital Assets and for Insurance Recoveries; long lived assets, such as utility plant, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of assets may not be recoverable.

Impairment would be determined based upon the undiscounted future operating cash flows to be generated during the remaining life of the asset's carrying value. An impairment loss would be measured by the amount that an asset's carrying amount exceeds its fair value.

Assets no longer being depreciated and to be disposed of would be separately presented in the statements of net position and reported at the lower of the carrying amount or the fair value less the cost to sell the asset. As long as the cost of the Authority's long-lived assets continue to be recovered through billings to its members, the Authority believes that such impairment is unlikely. Accordingly, no financial statement adjustments are presented in the asset structure of the Authority.

(e) Unrestricted and Restricted Cash and Cash Equivalents

Unrestricted cash is comprised of available cash to meet general operating needs.

Note 2 - Summary of Significant Accounting Policies (cont.)

(e) Unrestricted and Restricted Cash and Cash Equivalents (cont.)

Restricted cash and cash equivalents reflect restrictions for a specified purpose for future payments related to debt service on bonds, current and long-term debt, advances for project costs, and amounts to be returned to members. The Authority considers any short-term investments which have an original or remaining maturity of 90 days or less to be cash equivalents.

(f) Restricted Investments

Restricted investments reflect bond proceeds invested by the trustee in short-term and long-term duration investments allowable under the Authority's General Bond Resolutions and are held within the applicable bond fund accounts. In accordance with GASB Statement No. 72, these investments are considered available for sale as such investments have a determinable fair market value and can be matured at any time under the General Bond Resolution. Such investments include certificates of deposit, corporate bonds, and fixed income securities. These amounts are held for future debt service payments on the associated bonds and are recorded at their fair market value as of the financial statement date. The unrealized gain or loss on such investments, are reported as of the statement of net position date, as other comprehensive income or loss.

(g) Fair Value of Investments

GASB Statement No. 72, *Fair Value Measurement and Application*, defines fair value as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date". To increase consistency and comparability in fair value measurements and related disclosures, the fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). *Observable inputs* are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity.

Unobservable inputs are inputs that reflect the reporting entity's own analysis about those assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy that categorizes and prioritizes inputs used to estimate fair value are as follows:

Level 1 inputs - Are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.

Note 2 - Summary of Significant Accounting Policies (cont.)

(g) Fair Value of Investments (cont.)

Level 2 inputs - Are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. When market prices are not available, fair value is generally estimated using current market inputs for similar financial instruments with comparable terms and credit quality, commonly referred to as matrix pricing.

Level 3 inputs - Are unobservable inputs for the asset or liability. Unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. This involves management's estimation and judgment.

(h) Revenue and Purchased Power

The power supply and transmission products that the Authority obtains on behalf of its participating members and non-members are presented as purchased power and/or transmission. This power, delivered and billed to member and nonmember electric systems, is recorded as electric sales for resale. Other services provided to member and non-member systems are presented as service revenue.

In addition, the Authority holds undivided ownership interests which are audited by others as follows:

J. C. McNeil Generating Station Project # 2	19%
Highgate Converter Station Project #3	9.36% (sold in 2017)

Under the provisions of GASB No. 14, *Defining the Reporting Entity*, the assets, liabilities, revenues and expenses of these undivided ownership interests are included in the accompanying financial statements. Separate financial statements are available from the Authority for these jointly owned facilities.

(i) Fuel Inventory

Fuel inventories reflect the Authority's 100% ownership interest in the Project #10 fuel oil on hand and the Authority's 19% ownership in the McNeil project's fuel oil and woodchips. The Project #10 fuel oil is stated using the average cost method and the McNeil inventories are stated at cost as determined by the Burlington Electric Department, the project manager, using the average cost method.

(j) Restricted Investment in VT Transco, LLC

In accordance with GASB Statement No. 72, the Authority considers all its investments in VT Transco, LLC (TRANSCO) membership units as level 3 inputs and is reported at cost, which is management estimate of fair market value as no quotable market is available.

Note 2 - Summary of Significant Accounting Policies (cont.)

(j) Restricted Investment in VT Transco, LLC (cont.)

On January 23, 2009, the Vermont Public Utilities Commission (formerly the Vermont Public Service Board) provided an accounting ruling related to the accounting treatment of the Authority's purchase of TRANSCO membership units for the benefit of the Authority's members. In accordance with the accounting order issued by the Vermont Public Utilities Commission, the distribution income for Class A and Class B membership units is recognized when earned and applied to the appropriate debt service requirements when paid and will continue until the related debt is paid in full. The difference between the distributions received and the debt service paid is recorded as "net settlement expense". This amount is credited to each member's purchase power and transmission invoice in accordance with each member's interest in TRANSCO equity owned by the Authority.

All TRANSCO membership units owned directly by the Authority that were purchased with funds financed with a financial lender are recorded as a restricted investment. As the debt obligation related to those membership units are paid for and have yet to be released from pledge under the loan agreement, those units are recorded as a Restricted Investment-Eligible for Release.

All TRANSCO membership units owned by the Authority for the benefit of its members or those eligible to be a member have been recorded as a restricted investment. Below are the categories and definitions of those restricted investments:

Restricted Investment - Assets purchased by the Authority as allowed by the "TRANSCO Equity Agreement", or the "Supplement to TRANSCO Equity agreement" that are pledged as collateral against the corresponding debt obligation.

Restricted Investment - Eligible for release - Assets held for the benefit of certain of its members or non-members and those membership units whereby the debt obligation related to those membership units at stated value, have been paid for and have yet to be released from pledge under the loan agreement, or transferred to certain of its members. The stated value of paid units have been recorded as restricted equity - eligible for release, until such time the pledge related to those units is released from the bank and the required consents and approval by TRANSCO occurs.

(k) Investment in Hometown Connections, Inc.

In accordance GASB Statement No. 72, the Authority considers its unrestricted investment in Hometown Connections, Inc. (HCI) as level 3 inputs and is reported at cost, which is management estimate of fair market value as no quotable market is available.

Note 2 - Summary of Significant Accounting Policies (cont.)

(k) Investment in Hometown Connections, Inc. (cont.)

The Authority's holds an equal ownership interest in HCI a non-profit entity that was created with five other joint-action agencies to provide greater value to public power utilities by offering a variety of consulting and technology services, as well as advanced metering programs. By combining resources through this organization, HCI will help public power utilities of all sizes (including the VPPSA members) obtain the products and services they need to keep their electric systems robust and to preserve the benefits of community-owned, not-for-profit service.

(l) Interest rate swap agreements

The Governmental Accounting Standards Board (GASB) issued Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*, which require that the fair value of financial arrangements called "derivatives" or "derivative instruments" be reported in the financial statements of state and local governments. If a derivative effectively hedges (significantly reduces) an identified risk of rising or falling cash flows or fair values, then its annual fair value changes are deferred until the hedged transaction occurs or the derivative ceases to be effective. On the other hand, the annual change in the fair value of *other* derivatives is reported immediately as investment income or loss. The Authority has previously entered into various interest rate swap agreements with two lending institutions which reduce the exposure of volatility in interest rates on certain variable rate debt. As such, the Authority pays a variable rate of interest based upon a floating London Inter-Bank Offered Rate ("LIBOR"), on the outstanding debt plus the differential between its variable rate and the swap rate at the date of closing of the note.

As required under GASB 53, as of December 31, 2019 and 2018, the Authority has recorded the one remaining swap agreement as a hedging derivative and the value of the agreements' net present cash flows as of the statement of net position date have been recorded as a deferred outflow or deferred inflow and any unrealized gain or loss as other comprehensive income or loss in the statement of net position.

(m) Taxes

The Authority is a governmental entity and as such is exempt from income taxes under Internal Revenue Code Section 115. Although it is also generally exempt from municipal property taxes, the Authority pays an amount in lieu of taxes to the Town of Waterbury, Vermont for the property where the Authority's office is located, the City of Burlington, Vermont for the McNeil Generating Facility located in Burlington, Vermont, the Town of Swanton for the P10 Facility located in Swanton, Vermont, and the Vermont Electric Power Company for the Highgate Converter Project located in Highgate, Vermont. Such expenses amounted to \$298,472 and \$284,880 for the years ended December 31, 2019 and 2018, respectively.

Note 2 - Summary of Significant Accounting Policies (cont.)

(n) Operating and Non-Operating Revenues and Expenses

Under Title 30, Chapter 84 of the Vermont Statutes Annotated, the Authority may make and enforce rules and regulations which it deems necessary or desirable; as well as establish, levy and collect or may authorize by contract, franchise, lease, or otherwise, the establishment, levying and collection of rents, rates, and other charges:

- For the services afforded by the Authority, or afforded by or in connection with any project or properties which it may construct, erect, acquire, own, operate, or control, or with respect to which it may have any interest or any right to capacity thereof;
- For the sale of electric energy or of generation or transmission capacity or service as it may deem necessary, proper, desirable, and reasonable.

In addition, revenues collected as rents, rates, and other charges shall be at least sufficient to meet the expenses of the Authority, including operating and maintenance expenses, reasonable reserves, interest and principal payments, and other requirements of any trust agreements and/or resolutions securing bonds or notes.

Operating revenues are defined as all income received from member and non-member municipals, cooperatives, and other customers for services rendered. Operating expenses are defined as the ordinary costs and expenses of the Authority and for the operation, maintenance and repair of electric plant by project. Operating expenses include the cost of power production through the Authority's direct and/or joint ownership and/or participation in generating facilities, purchased power, system control and load dispatch, maintenance of transmission facilities, customer accounting and service expenses, administration and general expenses, and depreciation.

Operating expenses do not include the interest on bonds, notes, or other indebtedness.

Non-operating income is defined as income received from sources other than the income from the Authority's members and non-member municipals, cooperatives, and other customers for services rendered, as defined above. This includes, but is not limited to; interest income, distribution income, income related to direct purchases for the Authority's members, grant revenues, and bankruptcy and/or insurance settlements.

Non-operating expenses include distribution (net settlement) expense, interest expense, expenses related to direct purchases for the Authority's members, grant expenses, and expenses related to, bankruptcy and/or insurance claims.

(o) Equity Classifications

Equity is classified as net position and displayed in three components.

Note 2 - Summary of Significant Accounting Policies (cont.)

(o) Equity Classifications (cont.)

Invested in capital assets, net of related debt - Consists of capital assets including restricted capital assets, net of accumulated depreciation and reduced by outstanding balances of bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

Restricted assets - Consists of assets with constraints placed on the use either by (1) external groups such as creditors, grantors, bond resolutions, contributors or laws or regulations of other governments; or (2) laws through constitutional provisions or enabling legislation.

When both restricted and non-restricted resources are available for use, it is the Authority's policy to use restricted assets first for those expenses directly related to restricted obligations and unrestricted resources utilized as needed.

Unrestricted assets - All other assets that do not meet the definition of "restricted" or "invested in capital assets, net of related debt".

(p) Subsequent events

In preparing the financial statements, the Authority has evaluated events and transactions for potential recognition or disclosure through March 1, 2020, the date that the financial statements were available to be issued.

Note 3 - Unrestricted and Restricted Cash and Cash Equivalents

The custodial credit risk for deposits is the risk that in the event of a bank failure, the Authority's deposits may not be recovered.

The Authority's unrestricted and restricted deposits in the various banking institutions are insured under the FDIC insured amounts. In addition, a sweep account was established for those deposits held by Keybank, N.A. and amounts in excess of the FDIC insured limit in the Authority's primary operating accounts are transferred on a daily basis to a mutual fund investment account that invests in Federated Prime Obligations.

The Authority's restricted deposits related to Project #10 Revenue Bonds are held in mutual funds that invest in U.S. government obligations which have implied credit ratings of AAA.

These investment securities have varying maturities and are allowed under the applicable General Bond Resolution. For the years ended December 31, 2019 and 2018, the Authority's restricted deposits were fully secured.

Note 3 - Unrestricted and Restricted Cash and Cash Equivalents (cont.)

The Authority's restricted cash and cash equivalents are comprised of funding for the following specified purposes:

	2019	2018
Cash and Cash Equivalents - McNeil Project	2,320,336	1,909,500
Cash and Cash Equivalents - Project 10	5,687,616	4,895,504
Cash and Cash Equivalents - Highgate Project	(784)	0
Cash - Amounts Due Members	381,945	356,480
Total Restricted Cash and Cash Equivalents	\$8,389,113	\$7,161,484

Note 4 - Capital Assets

The Authority owns property in Waterbury, Vermont where its primary office is located, as well as the Project #10 generating facility located in Swanton, Vermont. In addition to the properties the Authority owns directly, the Authority is a 19% joint owner of the J.C. McNeil Generating Station, a wood and gas fired generating facility located in Burlington, Vermont. Capital assets and accumulated depreciation as of December 31, 2019 and 2018 are as follows:

Net Capital Assets	18,564,083	(1,044,071)	(292,689)	17,227,323

Total depreciation expense for the years ending December 31, 2019 and 2018 is \$1,639,906 and \$1,642,464, respectively.

Note 5 - Due from Members

During the normal course of operations, the Authority occasionally incurs costs that may or may not be recovered from the Authority's members in the same time period. As of December 31, 2019, the Authority recorded the following amounts due from Members:

Stonybrook Advances	\$ 18,900
Standard Offer Solar Projects	\$ 400
McNeil Advances	\$ 357,316
Total Amounts Due from Members	\$ 376,616

Note 6 - Restricted Investments

The following investments are held within the Series A, and Series B bond fund accounts which are allowed investments by the applicable General Bond Resolution. The cost, gross unrealized gains, gross unrealized losses, and fair market values of fixed maturity restricted short term and long-term investments as of December 31, 2019 are as follows:

	Cost	Unrealized Gains (Losses)	Fair Market Value
Federal Home Ln Mtg Corp	\$ 1,770,396	\$ 11,615	\$ 1,782,011
Federal Home Ln Mtg Corp	\$ 99,741	\$ 654	\$ 100,395
Total	\$ 1,870,137	\$ 12,269	\$ 1,882,406

Note 6 - Restricted Investments (cont.)

Cost and estimated fair value of restricted fixed maturity securities at December 31, 2019 by contractual maturity, are as follows:

<u>Maturity</u>	<u>Cost</u>	<u>Fair Market Value</u>
In 2019	\$ -	\$ -
2020 to 2021	\$ 1,870,137	\$ 1,882,406
Totals	\$ 1,870,137	\$ 1,882,406

The actual maturities may differ from contractual maturities because certain borrowers have the right to call or prepay obligations with or without call or prepayment penalties.

The Authority's classes of securities, as noted above, are categorized as Level 1 inputs in accordance with GASB Statement No. 72, as of December 31, 2019.

Note 7 - Restricted Investment in VT Transco, LLC Membership Units

In June 2006, Vermont Electric Power Company, ("VELCO") created VT Transco, LLC ("TRANSCO"), a limited liability company whose primary activity is the operation of the State of Vermont's electric transmission infrastructure. VELCO acts as manager of TRANSCO. Effective July 31, 2006, an operating agreement, between TRANSCO and its member systems was executed which outlined the affairs of the relationship between the member systems. The operating agreement was further amended and restated in 2007, 2008, 2010, 2012, 2013, 2017 and 2018.

Whereas prior to July 31, 2006 VELCO offered stock directly to the distribution utilities in Vermont to meet its equity needs, all future equity needs are funded by the offer of membership units in TRANSCO. The initial value of the Class A and Class B membership units per the TRANSCO operating agreement is \$10.00 per unit and does not reflect market value. As of December 31, 2018, and 2017, the Class A units pay a return of 11.5% and Class B units a pay 13.3% return.

As an alternative to members or non-members purchasing the TRANSCO membership units themselves, a municipal or cooperative that is a member, or eligible to be a member, of the Vermont Public Power Supply Authority ("Authority"), has the option to assign its subscription right for the purchase of membership units to the Authority, as allowed by the TRANSCO Operating Agreement.

In 2007, the municipal members and the Authority executed a "TRANSCO Equity Agreement" ("TRANSCO Equity Agreement"). The agreement was entered into by twelve of the Authority's members and the Authority. These members determined it may at times, be mutually advantageous and to their benefit, for the Authority to purchase those member units offered by TRANSCO to the member system. In August 2009, the agreement was amended.

Note 7 - Restricted Investment in VT Transco, LLC Membership Units (cont.)

The TRANSCO Equity agreement does not eliminate the member and/or eligible member's rights to purchase equity in TRANSCO directly; it simply provides the option to allow the Authority to purchase the units for the benefit of the member and/or eligible member and defined the terms should the member and/or eligible member find it advantageous to do so.

It further provides that upon each equity offer, each member and/or eligible member shall provide to the Authority, within a reasonable time, its intent and to what extent it would want the Authority to acquire the membership units for the benefit of the member and/or eligible member. The TRANSCO Equity Agreement requires the Authority to arrange for any necessary financing and/or Regulatory approvals required for its acquisition of TRANSCO equity.

The Authority is not required to participate in future TRANSCO equity issues or acquire additional membership units for the benefit of its members or non-members.

Members

During the period from 2007 - 2019, certain of the Authority's members utilized the benefit of the TRANSCO Equity Agreement and assigned their respective subscription rights for the purchase of TRANSCO membership units to the Authority. As of December 31, 2019, the Authority owns a total of 3,031,630 membership units with a total value of \$30,316,300 for the benefit of those certain members (excludes specific facility member units described below). The membership units and their related distribution income are pledged as security under a pledge and security agreement against the related debt obligations.

To facilitate the purchases of TRANSCO membership units, the Authority has entered into several financing arrangements over the 2007 - 2019, time period. In 2011, the Authority filed with the Vt. Public Utilities Commission and subsequently received approval to enter into long-term financing related to the consolidation of the existing notes previously obtained to facilitate the purchases of TRANSCO membership units for the benefit of certain Authority members. On June 30, 2011, the Authority entered into a loan arrangement with a local financial institution for an amount of \$16,677,516 for a period of ten years, at a fixed interest rate of 6.03%. On March 5, 2015 the financing institution amended the note to reflect a reduction in the interest rate to 5.34%, with all other terms remaining the same. On December 20, 2017 the note was refinanced with the same lender for a term of ten (10) years with a fixed interest rate of 4.06%.

In 2014, the Authority filed with the Vt. Public Utilities Commission and subsequently received approval to enter into long-term financing related to purchases of Transco membership units for the benefit of certain Authority members. On December 23, 2014, the Authority entered into a loan arrangement with a local financial institution for an amount of \$4,586,768.67 for a period of seven years, at a fixed interest rate of 4.28%. This note was refinanced with the same lender on October 17, 2017 for a term of ten (10) years with a fixed interest rate of 3.52%.

Note 7 - Restricted Investment in VT Transco, LLC Membership Units (cont.)

In 2016, the Authority filed with the Vt. Public Utilities Commission and subsequently received approval to enter into long-term financing related to purchases of Transco membership units for the benefit of certain Authority members. On October 30, 2016, the Authority entered into a long-term loan arrangement with a local financial institution for an amount of \$2,100,000 for period of ten (10) years at a fixed interest rate of 2.82%.

In 2017, the Authority filed with the Vt. Public Utilities Commission and subsequently received approval to enter into two long-term financings related to purchases of Transco membership units for the benefit of certain Authority members and the Authority directly.

On October 17, 2017, the Authority entered into a long-term loan arrangement with a local financial institution for an amount of \$1,591,450 for period of ten (10) years at a fixed interest rate of 3.52% and on December 28, 2017, the Authority entered into a long-term loan arrangement with a local financial institution for an amount of \$1,973,220 for period of ten (10) years at a fixed interest rate of 3.89%.

In 2018, the Authority filed with the Vt. Public Utilities Commission and subsequently received approval to enter into long-term financings related to purchases of Transco membership units for the benefit of certain Authority members and the Authority directly.

On December 20, 2018, the Authority entered into long-term loan arrangements with a local financial institution for an amount of \$1,172,140 and \$75,580 for period of ten (10) years at a fixed interest rate of 4.35%.

On July 1, 2019, Legislative changes to the language within Title 30 V.S.A. §108, went into effect- those changes eliminated the need for the Authority to obtain approval from the Public Utilities Commission for long-term financing. On November 25, 2019, the Authority entered into a long-term loan arrangement with a local financial institution for an amount of \$429,770 for a period of ten (10) yeas at fixed interest rate of 2.75%, for the purpose of facilitating the purchase of member units for the benefit of certain Authority members.

During 2019 and 2018 the Authority earned total distribution income from the units held for the benefit of its members' of \$3,741,630 and \$4,025,688, respectively.

The 2019 distribution income earned of \$3,741,630 for the units held for the benefit of its members paid down: principal on membership units previously acquired and financed in the amount of \$2,125,776, interest expense on the Authority's debt of \$690,027 an additional \$ 12,381 of reimbursed financing costs previously paid, thus leaving a net credit to its member's power costs recorded as distribution (net settlement) expense in the amount of \$913,446.

The 2018 distribution income earned of \$4,025,688 for the units held for the benefit of its members paid down: principal on membership units previously acquired and financed in the amount of \$2,008,562, interest expense on the Authority's debt of \$605,659 an additional \$ 10,959 of reimbursed financing costs previously paid, thus leaving a net credit to its member's power costs recorded as distribution (net settlement) expense in the amount of \$1,400,508.

Note 7 - Restricted Investment in VT Transco, LLC Membership Units (cont.)

Lamoille County Project - Members

During 2009, the Authority acquired 874,650 Lamoille County Project ("LCP") member units for the benefit of four members at a total value of \$8,746,500.

The distribution income related to the LCP member units is used to cover the amount of the interest costs to service the debt to purchase said LCP units by the Authority. The annual equity overbuy return is determined as the difference between the distribution income less the required annual interest costs, and each members' allocated annual specific facilities charges for a period of ten years.

After the tenth anniversary date of the acquisition, the LCP units must be repurchased by VT Transco, LLC if not acquired by other members or substitute members. For a period of ten years, the total annual specific facility charges for the four members total \$429,000 and are fixed in accordance with the settlement agreement. If the allocated annual equity over-buy return is less than zero, the allocated annual specific facility charge will be reduced by the amount of excess interest costs paid by the LCS member above its allocated portion of cash distribution received.

During 2019, the Authority earned distribution income of \$1,002,845 for the units held for the benefit of the LC participants. The distribution income paid down actual interest expense of \$592,211 paid on the Authority's debt and the remaining \$547,298 was recorded as distribution (net settlement) expense and credited to the LCP-members.

In 2018, the Authority earned distribution income of \$1,094,012 earned for the units held for the benefit of the LCP-members, paid down actual interest expense paid on the Authority's debt of \$546,656 and the remaining \$547,356 for each year was recorded as distribution (net settlement) expense and credited to the LCP-members.

The tenth anniversary date of the acquisition was on November 30, 2019 and the 874,650 member units held for the LCP-members were repurchased by VT Transco LLC. Therefore, at December 31, 2019 the restricted investment in VT Transco LLC owned for the benefit of the Lamoille County Project - Members was zero.

VELCO/Lyndonville Substation Project - Member

On December 10, 2010, the Authority executed and filed a Subscription agreement, to acquire for the benefit of the Village of Lyndonville ("LED"), an Authority member, specific facilities equity as offered to LED in TRANSCO's November 12, 2010 private placement offering. As part of that filing, LED assigned the subscription rights so offered to the member to the Authority.

Note 7 - Restricted Investment in VT Transco, LLC Membership Units (cont.)

VELCO/Lyndonville Substation Project - Member (cont.)

At December 31, 2019 and 2018 the restricted investment in VT Transco LLC owned for the benefit of the LED was 96,536 of Class A units valued at \$965,360 and 122,864 of Class B units valued at \$1,228,640, or total units valued at \$2,194,000. These units and future distribution income are pledged as security under a pledge and security agreement against the related debt obligation.

During both 2019 and 2018, the Authority earned distribution income from the units held for the benefit of LED of \$274,425 for each respective year. In 2019, the distribution income paid down actual interest expense of \$159,495 and \$159,495 in 2018, as well as costs of debt service in the amount of \$896 for each year. The remaining \$114,034 for both 2019 and 2018, was recorded as distribution (net settlement) expense and credited to LED.

AUTHORITY - Direct Purchase

In 2017, the Transco Operating Agreement was amended with language that provides the Authority the ability under certain circumstances to purchase member units in Vt. Transco, LLC directly for the benefit of the Authority (and subsequently the Authority's members).

The Authority has made the following direct purchases of member units in VT Transco, LLC:

YEAR	# of Member Units	Value
2019	2,460	\$ 24,600
2018	7,558	\$ 75,580
2017	98,617	\$ 986,170
Total	108,635	\$1,086,350

The Authority's total ownership at December 31, 2019 and December 31, 2018 was valued at \$1,086,350 and \$1,061,750, respectively. In 2019 and 2018 the Authority earned distributions of \$133,000 and \$134,145 respectively. In 2019 the distribution paid interest expense of \$28,539, principal payments of \$ 92,112, financing costs of \$351 and the remaining \$11,997 was used by the Authority to reduce operating costs to its members. In 2018 the distribution paid interest expense of \$28,539, principal payments of \$ 84,554, and the remaining \$21,052 was used by the Authority to reduce operating costs to its members.

The Authority's 2019 and 2017 purchases are unrestricted investments; whereas, the 2018 purchase is restricted due to the outstanding debt related to the purchase.

Note 8 - Investment in Hometown Connections, Inc.

As stated in Note 2 (k), the Authority holds an equal ownership in Hometown Connections, Inc. (HCI), with five (5) other partners - American Municipal Power, Inc., Missouri Public Utility Alliance, Northern California Power Agency, Alabama Municipal Electric Authority and Great Lakes Utilities. HCI is a not-for-profit entity that was established in May 2018 by five of the current members, with Great Lakes Utilities joining in 2019. The Authority invested \$265,000 for its equity ownership in the company. Each member has one (1) Director on the HCI Board of Directors and each member has equal voting authority.

Note 9 - Operating Line of Credit

The Authority maintains a credit facility to meet the Authority's operating needs.

The facility allows for a maximum principal amount of \$6,000,000 to be used for working operating needs and/or the issuance of letters of credit. The facility was renewed on June 30, 2017 for a term of three years, providing a maturity date of June 30, 2020.

The facility incurs a commitment fee in the amount of .10% of the unused facility per annum. Interest is payable monthly up to the date of maturity on said advances in accordance with the amended loan agreement. The interest rate accrues at (a) the adjusted prime rate, or (b) rates quoted by the bank to the Authority as the Adjusted Libor rate as it relates to LIBOR advances.

As of December 31, 2019, and 2018 there were no outstanding borrowings against the facility.

The operating line of credit is collateralized by the Authority's accounts, revenues, receipts and Power sales agreements not pledged as collateral against any other indebtedness.

Note 10 - Project Lines of Credit/Short-Term Notes Payable

As of December 31, 2019, and 2018, there were no outstanding lines of credit for the funding of construction projects and there were no outstanding short-term notes.

Note 11 - Bonds Payable

Outstanding revenue bonds payable consist of the following at December 31, 2019 and 2018:

Note 11 - Bonds Payable (cont.)

	December 31, 2018	Increases	Payments and reductions	December 31, 2019	Current Portion

Total outstanding bonds payable	\$ 17,055,000	-	1,465,000	14,450,000	1,140,000

Note 11 - Bonds Payable (cont.)

At December 31, 2019 and 2018, total interest expense on the Project #10 Series A Revenue Bonds was \$642,775 and \$679,675 and Project #10 Series B Revenue Bonds interest expense was \$32,066 and \$34,875.

The Project #10 Series A & Series B Revenue Bonds outstanding obligation are secured by a pledge and security interest of all the project revenues and income generated under the twelve participants Project #10 Power Sales Agreements and the associated funds and income generated by such funds held under the various bond resolution accounts. The Authority has agreed to collect such rates charges from participants as necessary to meet operating expenses of the project and debt service obligations of principal and interest, regardless of the in-service date.

Additionally, the Project #10 2009 Series A and B Revenue Bonds were insured by a municipal bond insurance policy issued by Assured Guaranty.

In 2017 the Authority advance refunded the 2009 Series A and Series B Bonds by issuing the 2017 Series A and Series B Refunding bonds. At December 31, 2017 the 2009 Series A and Series B bonds are considered defeased.

The future annual maturities of principal and interest on bonds payable consists of the following as of December 31, 2019:

	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2020	\$ 1,170,000	\$ 657,456	\$ 1,827,456
2021	\$ 1,215,000	\$ 610,738	\$ 1,825,738
2022	\$ 1,260,000	\$ 562,225	\$ 1,822,225
2023	\$ 1,330,000	\$ 500,013	\$ 1,830,013
2024	\$ 1,400,000	\$ 434,356	\$ 1,834,356
2025-2026	\$ 3,000,000	\$ 658,413	\$ 3,658,413
2027-2028	\$ 3,305,000	\$ 354,488	\$ 3,659,488
Thereafter	\$ 1,770,000	\$ 53,888	\$ 1,823,888
Total	\$14,450,000	\$ 3,831,575	\$18,281,575

The Authority's management believes it is in compliance with all bond covenants related to the Project #10 Bond resolution as of December 31, 2019 and 2018.

Note 12 - Amounts Due to Members from Restricted Assets

Citizens Utilities

On December 26, 2000, the Authority received \$688,626 on behalf of three members pursuant to a settlement agreement with Citizens Communication Company. As the settlement remained unresolved, the members elected to have the Authority retain the funds in the event the amount would have to be refunded to Citizens Communication Company. The amount was placed in an interest-bearing account. Upon settlement in November 2002, two of the members involved were paid their settlement allocations; however, one chose to leave the funds with the Authority.

The remaining proceeds have been recorded as a liability in Amounts Due to Members - payable from restricted assets. The outstanding balance of \$29,449 remained at December 31, 2019 and 2018.

A summary of amounts due members - payable from restricted cash and cash equivalents as of December 31, 2019 and 2018 is as follows:

	2019	2018
Citizens Utilities settlement	\$ 29,449	\$ 29,449
Orleans Transmission line	\$ 165,311	\$ 132,311
NEGT settlement funds due Orleans	\$ 165,609	\$ 165,609
Orleans accumulated interest	\$ 21,576	\$ 14,111
McNeil-Accrued Liabilities	\$ 0	\$ 2,467
HG Project	\$ 12	\$ 0
	\$ 384,957	\$ 361,947

Note 13 - Long-Term Debt

Long-term debt related to the Authority's borrowings are identified in the following charts, with corresponding balances as of December 31:

	2019	2018
Private placement note payable to United of Omaha Life Insurance Company, dated November 30, 2009, with a maturity of entire principal on November 30, 2019 at fixed rate of 6.25%. Note is collateralized by a security pledge agreement of 384,846 of Lamoille County Project (LCP) - Class A and 489,804 of Lamoille County Project(LCP) Class B VT TRANSCO, LLC membership units and the assignment of rights to all distribution income from ownership of the investment.	0	8,746,500

Thereafter	\$ 56,559	\$ 899	\$ 57,458
	<u>\$ 20,251,938</u>	<u>\$ 3,021,102</u>	<u>\$ 23,273,040</u>

Note 13 - Long-Term Debt (cont.)

At December 31, 2019 and 2018, total interest expense on the above borrowings was \$1,423,496 and \$1,454,235.

Each individual long-term debt obligation above related to TRANSCO activities is collateralized by a security and pledge agreement and rights to the distribution income received related to the allocated units acquired by such borrowing. As of December 31, 2019 and 2018, no membership units being held have been released as pledged security.

The future payment of the Authority's debt service costs related to the acquisition of the TRANSCO membership units, LCP member units and LED SF Units, is contingent on the financial stability of TRANSCO and the continuance of an adequate rate of return or distribution income in excess of the Authority's required debt service costs. VT Transco, LLC management can change its distribution rate in accordance with procedures in the TRANSCO Operating Agreement.

Any significant fluctuations in future cash flows of distribution income received from VT Transco, LLC could affect the Authority's ability to pay the debt service requirements on the outstanding obligations related to the investment.

Management believes the future rate of return will continue to remain in excess of its debt obligations. Further, should the rate of return become inadequate to cover the Authority's debt service costs, it is management's intent to collect that deficiency from those certain members in accordance with the amount of Transco equity the Authority has acquired for the benefit of those members and non-members. The collection of debt service costs related to this obligation directly from its member and non-members is contingent upon the financial stability of such members and non-members. The member and non-members revenue stream is governed by its allowable regulatory rates and customary payments and any inability to provide sufficient cash flows and provide reliable and credit rating capacities for borrowing could adversely affect the Authority.

The Authority believes it is in compliance with all debt covenants related to the above loan agreements at December 31, 2019 and 2018.

Note 14 - Interest Rate Swap Agreements

In June 2009, the Authority signed an International Swap and Derivative Association, Inc. ("ISDA") master agreement with TD Bank to provide the option of entering into a "pay fixed", countered by a "receive variable" interest rate swap with the lender. Given this option, the Authority confirmed a "pay fixed," countered by the "receive variable" interest rate swap on an outstanding long-term note with TD Bank in January 2011.

The Authority is exposed to interest rate risk on the existing interest rate swap agreement. As the LIBOR rate increases, the Authority's net payment on the swap decreases, and alternatively, if the LIBOR rate decreases the Authority's net payment on the swap increases.

Note 14 - Interest Rate Swap Agreements (cont.)

At December 31, 2019, the interest rate swap agreements have been recorded as follows:

Description	Valuation Date	Notional Amount	Date of Agreement	Maturity Date	Change in FVM of Swap Gain (Loss)
Pay fixed/ receive variable interest rate swap agreement	12/31/2019	\$2,194,000	01/04/2011	12/17/2020	(\$45,605)
Total derivative liability					(\$45,605)

Note 15 - Pension Plan

The Authority has a noncontributory defined contribution pension plan covering all employees. The money purchase plan was adopted October 1, 1978 and restated October 1, 1989 and February 10, 2000.

The pension plan was further amended January 1, 2007, restating it as a profit-sharing plan, known as Vermont Public Power Supply Authority Retirement Plan. Employees are eligible immediately, are considered 100% vested, and the minimum employer non-elective contribution equals 5% of employee’s gross wages provided the employee has met 1000 hours of service during the year. The employer’s 5% contribution is subject to Board approval. In addition, the employer will make an additional matching contribution of up to 3%, provided the employee provides evidence of a 3% contribution to a qualified retirement vehicle.

The plan is administered by a third-party administrator. Employer contributions to this plan for the years ended December 31, 2019 and 2018 were \$98,734 and \$90,330, respectively, amounting to approximately 8% of covered payroll.

Note 16 - Compensated Employee Absences/Employee Cafeteria Plan

Effective January 1, 2015, employees are eligible to accrue upon date of hire, paid vacation leave which is credited monthly. Full-time employees accrue vacation leave at a rate of 80 hours in year one and then an additional 8 hours for each year of service thereafter.

Part-time employees accrue a prorated vacation leave based upon the employee’s employment status. For those employees who previously earned more vacation hours under the prior vacation accrual methodology or who were granted more hours at the time of hire, the employee shall continue to maintain that level of accrual until such time the new methodology exceeds the prior accrual method that was granted based on years of service using the following schedule:

Note 16 - Compensated Employee Absences/Employee Cafeteria Plan (cont.)

0 < 5 years	2 weeks vacation per year
5 < 10 years	3 weeks vacation per year
10 < 20 years	4 weeks vacation per year
20 years and over	5 weeks vacation per year

Employees may not carry over more than 30 days accrued vacation leave into the next calendar year. Upon termination, voluntary leave, or retirement, employees are entitled to be compensated for all unused vacation leave up to the maximum amount allowed to accrue.

Employees are also entitled to paid sick leave. Sick leave accrues as of the date of hire at a rate of one day per month for full-time employees and prorated for part-time employees based on the employee's employment status. The maximum sick day accrual carried into the future year shall not exceed 45 days and upon termination of the employee all accrued sick time is surrendered.

At December 31, 2019 and 2018, the Authority's liability of accrued vacation under the current compensated absences policy is \$98,915 and \$89,297 and accrued sick leave under the previous compensated absences policy is \$8,353 and \$8,330. Accrued vacation is recorded as "other long-term liabilities and accrued sick leave is recorded as "other current liabilities".

On January 8, 2015, the Authority adopted a Cafeteria Plan with an effective date of February 1, 2015. The plan provides employees with the ability to capture tax savings by participating in the plan; specifically, payroll deduction for deposits to a health savings account, health flexible spending account and/or a dependent care flexible spending account.

As of December 31, 2019, and 2018, there was an accrued liability related to employee's health flexible spending accounts in the amount of \$484 and \$656, respectively.

Note 17 - Commitments, Contingencies, Uncertainties

At December 31, 2019, the Authority has no outstanding contractual commitments.

Insurance

The Authority is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; environmental contamination and natural disasters.

The Authority maintains commercial insurance coverage purchased in the name of the Authority covering each of those risks of loss, except for a portion of health insurance coverage related to retired employees, whereby the Authority fully reimburses those retirees for health-related deductibles and/or co-pays. Management believes such coverage is sufficient to preclude any significant uninsured losses to the Authority.

Note 17 - Commitments, Contingencies, Uncertainties (cont.)

In 2018 the Authority incurred damage to the Authority's office building during a wind storm. The Authority received \$19,120 related to the claim. As of December 31, 2018, the repairs were complete.

In 2019 and 2018, the Authority contributed \$500 to the H.S.A. account of each employee who elected family coverage, and \$250 to those employees who elected single coverage as participants in the Authority's High Deductible Health Plan ("HDHP").

Insurance settlements have not exceeded insurance coverage for any of the past three fiscal years, nor have claims exceeded available insurance coverage for health claims for any of the past three fiscal years.

Consulting Agreement

In 2006, the Authority entered into a contract with a former General Manager ("Consultant") to provide consulting services for a period of ten (10) years. This consulting portion of the contract obligation was fulfilled in 2016; however, the Authority remains obligated to provide health insurance coverage under the plan currently maintained by the Authority and supplemental Medicare coverage to both the Consultant and his spouse during their remaining life.

Collateral Commitments

In the normal course of business, the Authority may from time to time, enter into ISDA agreements with its power supply counterparties. The terms of the ISDA agreements, including threshold limits are specific to each of the counterparties. If at any time the threshold limits (both for the buyer and/or seller) are exceeded, the buyer or seller (depending on the threshold that was exceeded) may require the other party to post collateral. The collateral protects the requesting party in the event the contract is not honored. As the market prices decline, the Authority's exposure typically increases and as the market prices increase, the Authority's exposure typically decreases. Due to the nature of the organization and the thresholds that are generally established, it is not common practice for the Authority to request or require collateral as security on the power supply contracts. During both 2019 and 2018, the Authority did not request any counterparty to post collateral, nor did any counterparty request the Authority to post collateral.

Environmental Risks

The Swanton Peaker Project (Project 10) has multiple permits from the State of Vermont and other Regulatory agencies, with various reporting requirements associated with those permits. The licensing and operation of Project 10 are dependent upon compliance with all permits such as its air permit, storm water runoff permit, and wetland construction permit. The reporting requirements of these permits have required installation of various monitoring devices that help minimize the environmental risk of the project.

Note 17 - Commitments, Contingencies, Uncertainties (cont.)

Environmental Risks (cont.)

On December 13, 2019 the Authority received a notice of alleged violation from the Army Corps of Engineers related to a General Construction Permit received in 2008 for Project 10 (during project construction). The alleged violation occurred on a parcel of land owned by the Village of Swanton but permitted by the Authority for use during project construction. The Authority is working with the Village of Swanton and Fitzgerald Environmental Associates, LLC to prepare a response to this notice. Fitzgerald Environmental Associates has assessed likely costs to address the Notice as being between \$23,000 and \$78,000 to be split between the Project 10 Participants and the Village of Swanton. The Authority has recorded a Regulatory Asset and a Regulatory Liability for an estimated cost related to this issue and it is expected that this will be resolved in 2020.

Authority Project Assets

As previously noted in Note #4, the Authority owns 100% of the Swanton Peaker Project #10 and a 19% Joint ownership in the McNeil Generating Facility. As these assets are owned by the Authority, it is the Authority's responsibility to continuously monitor the assets to determine the value that they provide.

Rules and regulations within the industry and environmental changes have an impact on the viability of any project and the ultimate benefit that is gained from those project assets. At this time, the Authority believes the current project assets continue to provide value to the Authority and its project participants.

Note 18 - Power Supply Settlement Commitments

The Authority has a Master Supply Agreement with its member systems and an Interim Agreement for Central Dispatch Services Agreement with its non-member systems, for the settlement of their power supply resources and/or power supply arrangements that settle through the Authority's ISO-NE participant account. When combined, the optimized dispatch results in benefits from savings which accrue to each participant.

The Authority acts as a billing agent for seven (7) of the twenty participants with regard to their payments to power suppliers and/or transmission providers.

The following tables summarize all power supply resources available to meet the members and the non-member's total load obligations for those entities that participate in the settlement process through the ISO-NE and the Authority.

The list includes resources that may be owned directly by a member or non-member utility; however, the revenues from the ISO-NE flow through the Authority's settlement process. In addition, VPPSA makes bilateral purchases on behalf of its members and/or non-members and these transactions are also included in the list.

Note 18 - Power Supply Settlement Commitments (cont.)

The Members' total kWh resource entitlements are shown as a percentage of the Member's portfolio of resources available to meet the member's load obligations. For the years ending December 31, 2019 and 2018 they were:

MEMBERS	2019 kWh	%	2018 kWh	%

Sheffield Wind	7,761,950	6.7%		8,526,147	7.16%
Wrightsville Hydro	2,731,130	2.3%		2,512,159	2.11%
Total	116,303,984	100%		119,148,122	100%

A summary of the total Member and Non-Members' total kWh resource entitlements are shown as a percentage of the total resource entitlements that are included in the settlement process through the ISO-NE and the Authority.

TOTAL	2019 kWh	%		2018	%
Members	394,560,050	81.62%		364,264,871	75.35%
Non-Members	116,303,984	24.06%		119,148,122	24.65%
Total	510,864,033	106%		483,412,993	100%

Note 19 – Concentration of Risks

The J. C. McNeil Generating Station Project #2 contributed approximately 10.8% for 2019 and 12.1% for 2018 to annual gross revenues for the Authority.

The Swanton Peaker Project #10 contributed approximately 7.5% for 2019 and 7.5% for 2018 to annual gross revenues for the Authority.

Note 19 - Concentration of Risks (cont.)

Power Supply sources contribute significantly to the ability of the Authority to operate under its current business model. Should supply interruptions, price changes, contract terminations, shut down in operations of the units occur, the Authority could experience adverse or beneficial operating results and these results could be material.

Members provide the Authority with outlets for supply and transmission revenues, as well as cash flows for debt service repayments of the Authority. Any material changes to volumes, or supply, or any cash flow irregularity of the members could have an impact on the Authority's ability to discharge its future financial obligations and access to current and future financing.

The Authority regularly contracts with various and diverse professional and electric utility contractors. Adverse changes in the availability or quality of these sources could impact the business operations of the Authority.
